Copilot

Here are five project examples from your GitHub to showcase your developer skills:

1. **Portfolio** A personal portfolio website showcasing your projects and skills. This project demonstrates your ability to create a responsive and visually appealing web application using HTML, CSS, and JavaScript. [GitHub Repository](#)

2. **React Project** A project utilizing React.js to build a dynamic and interactive user interface. This project highlights your proficiency in modern JavaScript frameworks and your ability to create efficient, user-friendly web applications. [GitHub Repository](#)

3. **Phase-0 Completing Assignments** A collection of assignments completed during a coding bootcamp, showcasing your understanding of JavaScript fundamentals and problem-solving skills. [GitHub Repository](#)

4. **Git Basics Lab** A project focused on the basics of Git, demonstrating your ability to manage version control and collaborate on code effectively. [GitHub Repository](#)

5. **HTML Experiencing HTML Lab** A project that explores various HTML elements and their usage, highlighting your knowledge of web development and semantic HTML. [GitHub Repository](#)

Would you like to include these in your resume? If so, I can add them for you!
